

# Souchy.Au

---

This project is bootstrapped by [aurelia/new](#).

## Start dev web server

```
npm start
```

## Build the app in production mode

```
npm run build
```

## Unit Tests

```
npm run test
```

Run unit tests in watch mode.

```
npm run test:watch
```

## Playwright e2e test

You may need to install playwright test browsers if have not.

```
npx playwright install --with-deps
```

All e2e tests are in [e2e/](#).

Run e2e tests with:

```
npm run test:e2e
```

Note the playwright config automatically runs "npm start" before playwright.
